## REASONING

 Use reasoning to see which word within the group doesn't belong. Then explain why the one thing does not belong. Before giving up, you might want to check a reference book, or you might want to put your head together with one or two other students to see if as a group you can figure out the answers.

### EXAMPLE

1. a cat      a tiger      a leopard      a dog      a panther

The dog doesn't belong in the group as the rest are all part of the cat family.

1. mother      father      son      uncle      daughter
